- A45. Buttram's windmill, Woodbridge, Suffolk, during restoration with scaffolding and two sails.
- A46. Side view of Buttram's windmill during restoration.
- A47. View through a sail of surrounding countryside, Buttram's windmill.
- A48. Close up view of the spider, Buttram's windmill.
- A49. View along a sail, Buttram's windmill.
- A50. View up the tower of the fantail, Buttram's windmill.
- A51. Distant view of Buttram's windmill.
- A52. The restored Buttram's windmill.

- A53. Base of the tower and entrance door, Buttram's windmill.
- A54. In-line close up view of the fantail, Buttram's windmill.
- A55. Close up view of the fantail, Buttram's windmill.
- A56. Close up of fantail shaft bearing, Buttram's windmill.
- A57. View of the ground from the fantail support frame, Buttram's windmill.
- A58. Close up view of the ball finial at the top of the cap, Buttram's windmill.
- A59. View of the fantail gallery from above, Buttram's windmill.
- A60. The wooden framing inside the ogee shaped cap, Buttram's windmill.
- A61. The windshaft neck bearing, Buttram's windmill.
- A62. The wallower levelling mechanism, Buttram's windmill.
- A63. Inside view of the live curb, Buttram's windmill.
- A64. Inside view of the curb, Buttram's windmill.
- A65. The gearwheel drive onto the curb from the fantail, Buttram's windmill.
- A66. Gearwheel and worm drive from the fantail, Buttram's windmill.
- A67. Worm and gearwheel drive to the curb, Buttram's windmill.
- A68. Timber removed during the restoration, Buttram's windmill.
- A69. Inside the ground floor showing belt pulleys, Buttram's windmill.
- A70. A chain pulley just below the cap, Buttram's windmill.
- A71. Gearwheel drive to a belt pulley, Buttram's windmill.
- A72. Sack hoist pulley and chain, Buttram's windmill.
- A73. The iron brakewheel and sack hoist chain pulley, Buttram's windmill.
- A74. The iron wallow with chain pulley above, Buttram's windmill.
- A75. Slide rod mounting, Buttram's windmill.
- A76. Chain wheel, gears, slide racks and shaft, Buttram's windmill.
- A77. Timber joint, Buttram's windmill.
- A78. Timber joint, Buttram's windmill.
- A79. Tentering adjustment mechanism, Buttram's windmill.
- A80. Various pulley wheels, Buttram's windmill.
- A81. Oat roller, Buttram's windmill.
- A82. Auxiliary gearing and governor arms, Buttram's windmill.
- A83. Spurwheel and stone nut with auxiliary gearing, Buttram's windmill.
- A84. Spurwheel above belt drive to the governor, Buttram's windmill.
- A85. The flyball governor, Buttram's windmill.
- A86. Spurwheel and flyball governor, Buttram's windmill.
- A87. Mechanism for raising the stone nut out of mesh, Buttram's windmill.
- A88. A restored stone nut with full set of wooden cogs. Buttram's windmill.
- A89. Two sets of millstones with tuns, horses and hoppers, Buttram's windmill.
- A90. Making the new sail wips. Buttram's windmill.
- A91. Basic shaping of the wips, Buttram's windmill.
- A92. One of the new wips. Buttram's windmill.
- A93. A shallow rebate on a wip, Buttram's windmill.
- A94. One wip complete and second one in work. Buttram's windmill.
- A95. One of the new completed sails, Buttram's windmill.
- A96. New sail in place with passing fighter plane. Buttram's windmill.
- A97. Close up view of the poll end, Buttram's windmill.
- A98. View along a sail showing the shutter control rod. Buttram's windmill.
- A99. Brakewheel and wallower, Buttram's windmill.
- A100. A French burr runner stone with accessories, Buttram's windmill.
- A101. Repairing the external drive pulley, Buttram's windmill.
- A103. Rear view of Saxtead Green post mill. Suffolk.
- A104. Rear view of Saxtead Green post mill.

- A105. Mortise joints on the main post, Saxtead Green windmill.
- A106. Recess in a main beam where it rested on top of the main post, Saxtead Green windmill.
- A107. Brakewheel, wallower, spurwheel and stone nut, Saxtead Green windmill.
- A108. The fantail, Saxtead Green windmill.
- A109. Stairs, fantail track and external drive pulley, Saxtead Green windmill.
- A111. *Unknown smockmill?????? 1970.*
- A113. Track leading to Lacy Green windmill, Buckinghamshire.
- A114. Lacy Green windmill, Buckinghamshire
- A115. A French burr stone and sack stencil, Lacy Green windmill.
- A116. Drive to one of the pairs of millstone complete with its furniture, Lacy Green windmill.
- A117. Timber compass arm brakewheel and wallower, Lacy Green windmill.
- A118. A sack trolley stored in the timber brakewheel, Lacy Green windmill.
- A119. The timber wallower showing the mortise joints in the main shaft, Lacy Green windmill.
- A120. The footstep bearing for the main shaft, Lacy Green windmill.
- A121. Approach to Pakenham windmill, Suffolk.
- A122. The field containing Pakenham windmill.
- A123. Front view of Pakenham windmill.
- A124. Side view of Pakenham windmill.
- A125. Two of the patent sails, Pakenham windmill.
- A126. The counterweights on the end of the chain, Pakenham windmill.
- A127. First floor door and sack slide, Pakenham windmill.
- A128. Barred bulls-eye window, Pakenham windmill.
- A130. The track to the rear of Pitstone post mill, Buckinghamshire, 1970
- A131. Front view of Pitstone windmill.
- A132. Panoramic view including Pitstone windmill.
- A133. Front view of Pitstone windmill.
- A134. The joints where the quarter bars support the main post, Pitstone windmill.
- A135. Slack chain drive to the sack hoist, Pitstone windmill.
- A136. Belt drive to the fly-ball governor, Pitstone windmill.
- A137. The rods from the governor to the tenting mechanism, Pitstone windmill.
- A139. Front view of Wilton windmill, Wiltshire.
- A140. Rear view of Wilton windmill.
- A141. A monolithic grey stone runner millstone with a square eye, near Wilton windmill.
- A142. Dismantled cast iron windshaft with cross and brakewheel, Wilton windmill.
- A143. A French burr bottom millstone, Wilton windmill.
- A144. Millstone mounting, Wilton windmill.
- A146. Danzey Green post mill, Avoncroft Museum, Worcestershire.
- A147. The tailpole winch and wheel, Danzey Green windmill.
- A148. A curb runner, Danzey Green windmill.
- A149. Danzey Green windmill in its setting at Avoncroft.
- A150. One of the patent sails, Danzey Green windmill.
- A151. The sail cross and weather vane, Danzey Green windmill.
- A152. Tailpole winch, Danzey Green windmill.
- A153. The fly-ball governor, Danzey Green windmill.
- A155. A woodcut drawing of Wicken Fen pumping windmill, Cambridgeshire.
- A156. Cur-away drawing of Wicken Fen windmill.
- A158. A new sail for Kibworth Harcourt post mill, Leicestershire.

- C95. Horse mill, Smedjebo, Sweden.
- C97. A dog powered butter churn, Kommern Open Air Museum, Germany.

Box H, 35mm Colour slides, Haddenham Windmill.

A set of slides taken prior to any restoration of Haddenham windmill c.1960, and another set taken during the reconstruction of a new cap in October 1994.

- H1. Side view of Haddenham windmill, Cambridgeshire, c.1960.
- H2. Sunset with Haddenham windmill in the snow.
- H3. The state of the plaster rendering on the tower.
- H4. The state of the tower brickwork.
- H5. The pulley for an external engine.
- H6. The fantail mechanism minus the blades.
- H7. The cap winding mechanism.
- H8. The rear bearing of the windshaft.
- H9. Locating wheel on the curb.
- H10. Cap timbering open to the elements and bird population.
- H11. A pigeon inside the cap.
- H12. The wallower viewed from above.
- H13. Remains of the sack hoist.

- H14. The front end of the windshaft.
- H15. The brakewheel.
- H16. A shaft pintle in safe custody.
- H17. The gear meshing between brakewheel & wallower showing the wear on the cogs.
- H18. The empty poll end.
- H19. The windshaft neck bearing.
- H20. Close-up view of the windshaft neck bearing.
- H21. The cast iron circular windshaft.
- H22. The main vertical shaft.
- H23. The auxiliary drive pinion underneath the spurwheel.
- H24. One of the stone nuts below a French burr millstone.
- H25. The position of the governor.
- H26. The flyball governor, bridgetree and tentering arrangement.
- H27. The cast iron bridgetree and tentering arrangement.
- H28. The flyball governor.
- H29. The wire machine seen from above.
- H30. One set of millstone furniture.
- H31. Damsel and grain shoe.
- H32. A millstone rhynd.
- H33. The proof staff for use in levelling millstones.
- H34. Mill bills and handles.
- H35. The remains of the wire machine.
- H36. A frame.
- H37. The proof staff.
- H38. The miller's weighing balance.
- H39. A bricked-up fireplace.
- H40. The partly timbered new cap on the ground, October 1994.
- H41. The new skeleton fantail.
- H42. The restored windshaft supported in position with bricks.
- H43. The poll end and new neck bearing for the restored windshaft.
- H44. The new rear bearing for the restored windshaft.
- H45. New timber mortise joint.
- H46. The brakewheel retaining plates on the restored windshaft.
- H47. the inside of the timbered ogee cap.
- H48. The arrival of the crane for lifting the completed cap.
- H49. The new cap and crane.
- H50 to H65. Lifting the new cap in place on top of the tower.
- H66. Haddenham windmill with new cap, October 1994.
